## 公司介紹/Company profile

寶喬群生物科技股份有限公司，擁有ISO 22716GMP國際化妝品及皂基優良製造規範認證工廠，以「品質、科技、創新」為訴求致力於生產研發最高品質的保養品化妝品，累積多年豐富代工經驗，不斷吸取國內外先進科技訊息以求發展，生產具獨特性及更貼近需求者產品，使每位顧客的產品皆具有競爭力。

廠內擁有標準無塵廠房、最新儀器設備、實驗室標準檢測程序，服務範圍有專業皂基生產、透明與弱酸皂基、皂基批發與代工製造、醫學美容保養品、生化科技保養品、清潔用品、化妝品原料、產品充填、產品包裝設計、產品研發打樣服務等。我們不僅用心於產品品質，更以最嚴謹的生產流程，為顧客提供最細心周全的服務，積極與客戶建立密切的夥伴關係。

Bao Giao Gun Biotechnology Co Ltd. owns an ISO 22716 GMP certification for international cosmetic and soap base manufacturing specification and certified factory. With "Quality", "Technology" and "Innovation" in mind, and focusing on researching and producing highest quality of cosmetic products, we accumulates years of OEM experiences and continues to adopt from latest domestic and foreign information and technologies for developing and manufacturing unique and customer-oriented products, and improving competitiveness for all our customers' products.

The factory follows standard clean rooms, latest equipments, laboratory SOP procedure, and provides services ranging from professional soap base production, clear and cream low sweat soap base, wholesale and OEM manufacturing of soap base, medicinal and cosmetic care products, bio-tech care products, medicinal cosmetic care products, cleaning products, cosmetic raw materials, product packaging, packaging design and product research. Not only focusing on quality of the products, we also follow the strictest manufacturing process, to provide our customers with careful and complete services, and establishing closer partner relationships with our customers.

洗衣錠、沐浴錠、洗手錠

Laundry tabs, Bath tabs, Handwashing tabs.

## 提供專屬客製化皂基服務

名稱	熔點	凝固點	耐濕度	包裝	特性及適用範圍
 透明甘油皂基N	60±1	40±1	80±3	25KG/箱	天然植物來源，泡沫豐富細緻，洗感清爽不黏膩，適合各式手工皂。
 透明甘油皂基G	55±1	38±1	75±3	25KG/箱	天然植物來源，含大量天然甘油，較低的凝固點，常溫時凝固時間長，適合操作時間較久之手工皂。
 乳白甘油皂基N	60±1	40±1	80±3	25KG/箱	天然植物來源，泡沫豐富細緻，洗感清爽不黏膩，適合各式手工皂。
 乳白甘油皂基G	55±1	38±1	75±3	25KG/箱	天然植物來源，含大量天然甘油，較低的凝固點，常溫時凝固時間長，適合操作時間較久之手工皂。
 羊毛脂皂基	60±1	40±1	80±3	30KG/箱	含羊毛脂成分，泡沫質地細緻，洗感較滋潤，適合乾性肌膚使用。
 胺基酸皂基	60±1	40±1	80±3	30KG/箱	天然胺基酸來源，極佳的親膚性，泡沫細緻，洗感滑順柔嫩清爽，適合敏感性肌膚使用。
 無患子皂基	60±1	40±1	80±3	25KG/箱	天然無患子萃取液添加，呈天然的淡咖啡色，泡沫純淨，溫和潔淨肌膚，洗淨後不乾澀緊繃。

備註：皂基前後端因模具關係成型會有凹陷及氣泡，屬正常現象，不影響作皂。

## We Provide The Service For Customized Soap Base

Name	Melting point	Setting Point	Humidity Tolerance	Packaging	Features & Applications
 Clear Glycerin Melt & Pour Soap Base (N Type)	60±1	40±1	80±3	25KG /Carton	<ul style="list-style-type: none"> <li>•Natural sources from plants.</li> <li>•With delicate foam.</li> <li>•Feeling fresh after cleansing.</li> <li>•Suitable for all kinds of handmade soap.</li> </ul>

透明甘油皂基N款

Clear Glycerin Melt & Pour Soap Base (N Type)

Dimension of outer box 25kg/箱  
外箱尺寸 352mm\*348mm\*238mm

熔點/Melting point	60±1°C
凝固點/Setting point	40±1°C
耐濕度/Humidity tolerance	80±3rh
pH 值/pH (1%水溶液@70°C)	8.6~9.2
硬度/Hardness	22~35HA

特色/Features

天然植物來源，泡沫豐富細緻，洗感清爽不黏膩。

- Natural sources from plants.
- Numerous delicate foam.
- Feeling fresh after cleansing.

主要成分/Ingredients

去離子水、甘油、椰油酸鈉、白糖、棕櫚酸鈉。  
Aqua, Glycerine, Sodium Cocoate, Sucrose, Sodium Palmitate.

透明甘油皂基G款

Clear Glycerin Melt & Pour Soap Base (G Type)

Dimension of outer box 25kg/箱  
外箱尺寸 352mm\*348mm\*238mm

熔點/Melting point	55±1°C
凝固點/Setting point	38±1°C
耐濕度/Humidity tolerance	75±3rh
pH 值/pH (1%水溶液@70°C)	8.6~9.2
硬度/Hardness	22~35HA

特色/Features

天然植物來源，含大量天然甘油。

- Natural sources from plants.
- Rich with natural glycerin.

主要成分/Main ingredient

去離子水、甘油、椰油酸鈉、白糖、棕櫚酸鈉。  
Aqua, Glycerine, Sodium Cocoate, Sucrose, Sodium Palmitate.

低吸濕透明皂基

Clear Low Sweat Melt & Pour Soap Base

Dimension of outer box 25kg/箱  
外箱尺寸 410mm\*250mm\*292mm

熔點/Melting point	63±1°C
凝固點/Setting point	43±1°C
耐濕度/Humidity tolerance	85±3rh
pH 值/pH (1%水溶液@70°C)	8.6~9.2
硬度/Hardness	22~35HA

特色/Features

較高的熔點及硬度，耐高濕度，遇水不易軟爛。

- Higher melting point and hardness than others.
- Higher humidity resistance.
- Not easy to become muddy than others.

主要成分/Ingredients

去離子水、甘油、月桂酸、棕櫚酸、氫氧化鈉。  
Aqua, Glycerine, Lauric Acid, Palmitate Acid, Sodium Hydroxide.

低吸濕乳白皂基

White Low Sweat Melt & Pour Soap Base

Dimension of outer box 25kg/箱  
外箱尺寸 410mm\*250mm\*292mm

熔點/Melting point	63±1°C
凝固點/Setting point	43±1°C
耐濕度/Humidity tolerance	85±3rh
pH 值/pH (1%水溶液@70°C)	8.6~9.2
硬度/Hardness	22~35HA

特色/Features

較高的熔點及硬度，耐高濕度，遇水不易軟爛。

- Higher melting point and hardness than others.
- Higher humidity resistance.
- Not easy to become muddy than others.

主要成分/Main ingredient

去離子水、甘油、月桂酸、棕櫚酸、氫氧化鈉、二氧化鈦。  
Aqua, Glycerine, Lauric Acid, Palmitate Acid, Sodium Hydroxide, Titanium Oxides.

羊毛脂皂基

Lanolin Soap Base

Dimension of outer box 30kg/箱

外箱尺寸 435mm\*350mm\*222mm

熔點/Melting point	60±1°C
凝固點/Setting point	40±1°C
耐濕度/Humidity tolerance	80±3rh
pH 值/pH (1%水溶液@70°C)	8.6~9.2
硬度/Hardness	22~35HA

特色/Features

含羊毛脂成分，泡沫質地細緻，洗感較滋潤，適合乾性肌膚使用。

- Lanolin included.
- With delicate foam.
- With higher moisture level, and suitable for dry skin type.

主要成分/Ingredients

去離子水、甘油、月桂酸、白糖、羊毛脂。  
Aqua, Glycerine, Lauric Acid, Sucrose, PEG-75 Lanolin.

植物乳霜皂基

Cream Soap Base

Dimension of outer box 25kg/箱

外箱尺寸 405mm\*276mm\*250mm

熔點/Melting point	60±1°C
凝固點/Setting point	42±1°C
耐濕度/Humidity tolerance	80±3rh
pH 值/pH (1%水溶液@70°C)	8.6~9.2
硬度/Hardness	22~35HA

特色/Features

含大量植物乳霜成分，泡沫質地豐潤厚實，絕佳親膚性，使用後肌膚滑順細緻滋潤。

- With plenty of vegetal cream.
- With delicate and opulent foam.
- Excellent skin-friendly feeling, and makes your skin feeling smooth, soft and moisturized.

主要成分/Main ingredient

去離子水、甘油、月桂酸、白糖、氫氧化鈉、椰油醯酐乙磺酸鈉。  
Aqua, Glycerine, Lauric Acid, Sucrose, Sodium Hydroxide, Sodium Cocoyl Isethionate.

乳白甘油皂基N款

White Glycerin Melt & Pour Soap Base (N Type)

Dimension of outer box 25kg/箱

外箱尺寸 352mm\*348mm\*238mm

熔點/Melting point	60±1°C
凝固點/Setting point	40±1°C
耐濕度/Humidity tolerance	80±3rh
pH 值/pH (1%水溶液@70°C)	8.6~9.2
硬度/Hardness	22~35HA

特色/Features

天然植物來源，泡沫豐富細緻，洗感清爽不黏膩。

- Natural sources from plants.
- With delicate foam.
- Feeling fresh after cleansing.

主要成分/Ingredients

去離子水、甘油、椰油酸鈉、白糖、棕櫚酸鈉。  
Aqua, Glycerine, Sodium Cocoate, Sucrose, Sodium Palmitate.

乳白甘油皂基G款

White Glycerin Melt & Pour Soap Base (G Type)

Dimension of outer box 25kg/箱

外箱尺寸 410mm\*250mm\*292mm

熔點/Melting point	55±1°C
凝固點/Setting point	38±1°C
耐濕度/Humidity tolerance	75±3rh
pH 值/pH (1%水溶液@70°C)	8.6~9.2
硬度/Hardness	22~35HA

特色/Features

天然植物來源，泡沫豐富細緻，洗感清爽不黏膩。

- Natural sources from plants.
- With delicate foam.
- Feeling fresh after cleansing.

主要成分/Main ingredient

去離子水、甘油、椰油酸鈉、白糖、棕櫚酸鈉。  
Aqua, Glycerine, Sodium Cocoate, Sucrose, Sodium Palmitate.

胺基酸皂基

Amino Acid Soap Base

Dimension of outer box 30kg/箱  
外箱尺寸 435mm\*350mm\*222mm

熔 點/Melting point	60±1°C
凝 固 點/Setting point	40±1°C
耐 濕 度/Humidity tolerance	80±3rh
pH 值/pH(1%水溶液@70°C)	8.6~9.2
硬 度/Hardness	22~35HA

特色/Features

天然胺基酸來源，極佳的親膚性，泡沫細緻，洗感滑順柔嫩清爽。

- Natural sources of Amino acid.
- With delicate foam.
- Excellent skin-friendly feeling, and make your skin feeling smooth, soft and refreshing.

主要成分/Ingredients

去離子水、甘油、椰油酸鈉、白糖、胺基酸衍生物。

Aqua, Glycerine, Sodium Cocoate, Sucrose, Sodium Lauroyl Glutamate.

麩胺酸鹽晶皂基

Glutamic Acid Soap Base

Dimension of outer box 10kg/箱  
外箱尺寸 405mm\*276mm\*250mm

熔 點/Melting point	70±1°C
凝 固 點/Setting point	50±1°C
耐 濕 度/Humidity tolerance	90±3rh
pH 值/pH(1%水溶液@70°C)	5.8~6.2
硬 度/Hardness	2~15HA

特色/Features

天然胺基酸來源，極佳的親膚性，泡沫細緻，洗感滑順柔嫩清爽。

- With crystal clear texture appearance.
- Downy-feeling cleansing foam.

主要成分/Main ingredient

去離子水、甘油、月桂醇聚醚硫酸酯鈉鹽、椰油醯基麩氨酸三乙醇胺鹽、月桂醯谷氨酸鈉。

Aqua, Glycerine, Sodium Laureth Sulfate, TEA-Cocoyl Glutamate, Sodium Lauroyl Glutamate.

無患子皂基

Chinese Soap Berry Soap Base

Dimension of outer box 25kg/箱  
外箱尺寸 352mm\*348mm\*238mm

熔 點/Melting point	60±1°C
凝 固 點/Setting point	40±1°C
耐 濕 度/Humidity tolerance	80±3rh
pH 值/pH(1%水溶液@70°C)	8.6~9.3
硬 度/Hardness	22~35HA

特色/Features

天然無患子萃取液添加，呈天然的淡咖啡色，泡沫純淨，溫和潔淨肌膚，洗淨後不乾澀緊繃。

- Natural Chinese soap berry extract added appears light brown color.
- Cleans skin with pure foam.
- Soft and tender touch, without feeling dry and tight after cleansing.

主要成分/Ingredients

去離子水、甘油、椰油酸鈉、白糖、無患子果萃取。

Aqua, Glycerine, Sodium Cocoate, Sucrose, Sapindus Mukurossi Fruit Extract.

液態皂基

Liquid Soap Base

Dimension of outer box 25kg/箱  
外箱尺寸 410mm\*250mm\*292mm

熔 點/Melting point	NA
凝 固 點/Setting point	NA
耐 濕 度/Humidity tolerance	NA
pH 值/pH(1%水溶液@70°C)	9.2~9.8
硬 度/Hardness	NA

特色/Features

天然植物來源，泡沫豐富細緻，洗感清爽不黏膩。

- Natural sources from plants.
- Numerous delicate foam.
- Feeling fresh after cleansing.

主要成分/Main ingredient

去離子水、甘油、氫氧化鉀、月桂酸、硫酸月桂酸鈉。

Aqua, Glycerine, Potassium Hydrate, Lauric Acid, Sodium Lauryl Sulphate.

## 果凍皂基

NEW

Jelly Soap Base

Dimension of outer box 10kg/箱  
12kg/箱  
外箱尺寸 318mm\*224mm\*112mm  
363mm\*333mm\*181mm

熔點/Melting point	66±2°C
凝固點/Setting point	48±2°C
耐濕度/Humidity tolerance	NA
pH 值/pH (1%水溶液@70°C)	5~6
硬度/Hardness	NA

### 特色/Features

天然海藻膠來源，Q彈、柔嫩；泡沫細緻綿密，深層潔淨肌膚；透明度高，低刺激性。

- Made from natural seaweed gel.
- With high transparency appearance, soft and flexible touch.
- Deep skin cleansing but low irritant caused.

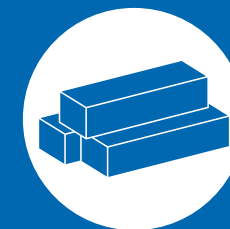

### 主要成分/Ingredients

去離子水、甘油、月桂醇聚醚硫酸酯鈉鹽、三仙膠、海藻膠。

Aqua, Glycerine, Sodium Laureth Sulfate, Xanthan Gum, Algae Extract.

果凍皂

## 專屬客製化皂基

專業製造 · 品質信賴

## 手工甘油皂超簡單製作方法

要做手工甘油皂，首先要有甘油皂基，一般手工製作的冷製皂程序較一般手工香皂更為繁雜，所需要的材料也較多，甘油皂基的製作可省去時間及麻煩，取而代之的是許多的樂趣。材料除了甘油皂基之外，可以添加自己喜歡的添加物，如：花草、油脂、香精，讓手工皂洗感更保濕更滋潤。

### Step1.

準備好工作環境、材料以及模型後，將甘油皂基切成小塊。

Set up the working environment, materials and molds, then cut the soap base into little cubes.

### Step2.

將切好的皂基放入容器中，一般市售香皂的大小約100公克，算算看要做幾塊香皂，乘上100公克就是需要的份量。

Put those little cubes into a container, the commercially available soap weights 100g per piece, and you could calculate the amount you need first to prepare materials.

### Step3.

將甘油皂基直接加熱溶解，不必加水可以用瓦斯爐隔水加熱或電磁爐小火直接加熱，直到皂基完全溶解。

Melt the glycerin soap base directly by induction cooker with lower power, or via water with barrier by stove, until the soap base totally melt.

## The simplest way to make handmade glycerin soap

To make the handmade soap, the first thing you need is the glycerin soap base. Normally, the process of CP soap needs a lot more materials, and is more complicated than regular handmade soap. Precluded those time wasting and troubles, glycerin soap base offers plenty of interests for you to make the handmade soap. To let your handmade soap more moisturizing and better cleansing sense, you may add some additives such as herbs, plant refined oil, grease or essences you like, besides glycerin soap base.

### Step4.

加入添加物，例如色料，輕輕攪拌均勻，倒入模型，待冷卻脫模即可。

Put in the additives such as colorant, stir well gently, and then pour them into the mold, and finally, you could demolding the soap while them cold.

### Step5.

美美的香皂也要美美的包裝，盡量不要讓香皂和潮濕的空氣接觸，香皂會流汗產生一層水氣覆蓋在香皂上影響美觀，所以可包一層白紙或保鮮膜。

Beautiful soap needs good looking packaging to make it conspicuous, and prevents to leave the soap in the moist environment directly, as a result of it will covered a layer of sweat-looking water, and affect the appearance. Therefore, you could pack the soap with a piece of white paper or plastic wrap after done.

小叮嚀：

如果您心愛的香皂緊緊黏在模子上，任憑您怎麼倒都倒不出來，別怕！使用酷刑就對了！將模型仍進冷凍庫，好好的冰它一陣子，香皂就會乖乖脫模囉！

If your lovely soap stick too tight on the mold, and couldn't come off no matter how, the only thing you should do is put them into the freezer for a while, and it will come off real easily after this step.

## 常見皂基使用Q&A

### 寶喬群皂基與市面上販售的產品有何不同？

都是使用「純天然植物性」的皂基，它的質性溫和、泡沫細緻，而市面上的皂基種類很多，品質較不穩定，所以價格通常比較便宜。目前市售清潔產品種類及其原料大概分成下列幾種：

種類	主要原料	形狀、顏色、味道
植物性透明香皂	純植物性油脂(橄欖油、甘油、保潔劑等)	粒狀、條狀、淡黃色、透明、具油脂味
混合透明香皂	植物性油脂+動物油脂(牛油)	塊狀、無色、微黃、具油脂味
合成植物性透明皂	植物性油脂+化學合成油脂+起泡劑(化學)	塊狀、無色透明或淡黃色、無味
沐浴乳	化學酸+起泡劑+防腐劑(香料、保潔劑)	乳狀、多為乳白色、各色各味
洗髮精	化學酸+起泡劑+防腐劑(香料等)	液狀、各色各味

### 為什麼有的手工皂成品會冒水汗？

因為手工皂成分含有甘油，甘油會吸附空氣的水分子在香皂表面，所以有時候香皂表面看起來好像冒汗的樣子，這是正常的現象。而甘油是屬於水溶性的，台灣又是海島型氣候，濕氣較重，若浴室太過潮濕的話，可以放在較通風乾燥的地方，應該會減少冒水汗現象。

### 如何減少手工皂冒水汗的現象？

溶皂基時，不可加熱太久，且皂基溶化後須馬上熄火，等冷卻至40度左右，再加入顏料、精油，還有下雨天最好不要做手工皂，以減少冒水汗機會。

### 手工皂成品已經用保鮮膜包好了，可是裡面又有冒水汗現象，如何處理？

將保鮮膜拆開後，用衛生紙擦乾，過幾天自然陰乾後再重新包裝即可。

(香皂品質不變仍可正常使用，只是外觀不好看而已)

### 市面香皂泡沫都很多，手工皂較少，這對清潔效果有影響嗎？

其實泡沫的多寡並非決定清潔力的因素，因為泡沫愈多只是表示使用化學起泡劑愈多而已，使用者感覺上好像會洗得比較乾淨，其實並不會增加洗淨效果，反而是多浪費水而已。

### 如何增加手工皂的泡沫？

手工皂是純天然的泡沫，而沐浴乳則是加入化學起泡劑，如果手工皂也想要多一點泡沫的話，可以加入胺基酸及乳霜類等植物性所提煉之水性醣脂，這樣就能增加一些泡沫了。

### 香皂要調降pH值，應該添加什麼東西？

可添加檸檬酸、乳霜、竹醋液，但不可加太多，否則會太酸，香皂會很軟，最後用試紙檢測一下。

## Common soap base using Q&A

### Q: What's the difference between the soap base of BGG and commercially available ones?

A: Both soap bases are made from natural sources from plants, moderate and with delicate foam. However, there're multiple soap bases on the market with unsteady quality, so their prices will be cheaper normally. The type and the material of the cleansing products on the market are as below:

Type	Main Material	Shape, Color, Smell
Transparent Natural Vegetal Soap Base	natural oil from plants (olive oil, glycerin, humectant)	granular, strip, light yellow, transparent, smells greasy
Transparent Mixed Soap Base	plant refined oil + animal fat (butter)	blocky, no color, yellowish, smells greasy
Synthetic Vegetal Soap Base	plant refined oil + chemical synthetic grease + foaming agent (chemical)	blocky, no color, yellowish, no smell
Shower gel	chemical acid + foaming agent + preservative (fragrance, humectant)	milky, normally milky white, different color and smell
Shampoo	chemical acid + foaming agent + preservative (fragrance...etc.)	liquid, different color and smell

### Q: Why some of the handmade soap looks sweating?

A: The reason why handmade soap looks sweating is because it includes glycerin, which the characteristic makes water adsorptive on the soap surface, and also, the glycerin classify as water-soluble, meet the Island-type climate country with high-moisture-Taiwan, caused the soap surface looks like sweating, that's the normal phenomenon. You could keep the soap in the ventilation environment to reduce the situation of the soap sweating-phenomenon.

### Q: How to reduce the situation of the handmade soap sweating-phenomenon?

A: Do not heat for too long while melting soap base, and turn of the fire right after the soap is melt, add color, essential oil after the temperature reduces to around 40 · C. Additionally, do not make the handmade soap in the rainy day to prevent the chance of the soap sweating-phenomenon.

### Q: How to deal with the situation of the soap sweating-phenomenon, when the handmade soap is already packed by plastic wrap?

A: Open the plastic wrap first, and wipe the soap with tissue paper, than dry them in the shade for few days than re-wrap them. (The quality of soap won't be changed; the only different will be the appearance is not that perfect anymore.)

### Q: Does it affect any of cleansing result as the foam of commercially available soap is much more than handmade soap?

A: In fact, the amount of foam does not affects the cleansing result, because the abundant foam only means that it includes a lot of chemical foaming agent, not only wasting more water, but also gave the illusion of "more foam more clean" to the users.

### Q: How to increase the foam of handmade soap?

A: The foam of handmade soap is natural, but most of shower gel added chemical foaming agent. If you want some more foam from handmade soap, to add some water-based glycolipid refining from plants will be a good choice.

### Q: What should we add to the soap to reduce the pH?

A: We could add some citric acid, cream and bamboo vinegar, but keep it moderate, or too much acidic will let the soap becomes too soft. At last, do not forget to test with the test strip after done.

## 皂的類別/Types of soap

	機器皂	手工皂	
類型	機器皂	CP皂-冷製法 (Cold Process)	甘油皂-HP皂-熱製法 (Hot Process)
敘述	市面上一般的香皂又稱機械皂，利用工業石化原料，碳酸鈣等粉狀原料，透過機械擠壓製成。一般市售肥皂泡沫多、遇水不易軟化，卻往往是增稠劑、添加物的功勞，清潔力雖強，但親膚性卻較差。	一般手工製皂者最常用的方法，就是將油和氫氧化鈉溶合加熱到約攝氏45度，混合攪拌至濃稠狀後即入模，使皂液經續在模形中凝固，皂化完成的時間因油的種類，晾皂需四至八周不等。	採用植物性油脂，例如：椰子油、棕櫚油、蓖麻油.....等製作而成，將脂肪酸從天然油脂中提煉出來；對於肌膚傷害性較低，且不易產生過敏。
優點	<ol style="list-style-type: none"> <li>1. 價格便宜</li> <li>2. 硬度較硬</li> </ol>	<ol style="list-style-type: none"> <li>1. 價格較高</li> <li>2. 天然油脂皂化</li> </ol>	<ol style="list-style-type: none"> <li>1. 色彩變化豐富</li> <li>2. 甘油保濕度高</li> <li>3. 天然植物油提煉</li> <li>4. 不需晾皂</li> <li>5. 添加香精及萃取液時影響皂體較少</li> <li>6. 可做豐富造型變化</li> </ol>
製作時間	可快速量產	晾皂時間較長 (約45天)	不需晾皂，可快速生產。
缺點	<ol style="list-style-type: none"> <li>1. 清潔力強。</li> <li>2. 親膚性較差。</li> </ol>	<ol style="list-style-type: none"> <li>1. 晾皂時間過短，氫氧化鈉未皂化完全，容易傷害皮膚。</li> <li>2. 存放一段時間後容易有油耗味。</li> <li>3. 色彩變化較侷限。</li> <li>4. 晾皂時間長，香精容易揮發。</li> </ol>	<ol style="list-style-type: none"> <li>1. 價格較一般市售機械皂高。</li> <li>2. 實體硬度較機械皂及CP皂軟。</li> </ol>
成品圖			

	Mechanical Soap	Handmade soap	
Type	Mechanical Soap	Cold Process	Hot Process
Description	Most soap on the market is mechanical soap. They made from natural gas origin ingredients, such as calcium carbonate powder, and stamp-pressed by machine. Commercially available soap which with delicate foam, and keep high hardness when soaking in the water, because of its thickener and other additives. Mechanical soap might offer better cleansing result, but worse skin-friendly feeling.	Normal handmade soap manufacturing procedure is mix the oil and sodium hydroxide solution and heat it till 45 ° C, pouring into the mold generally while it becomes thick, then let them solidify in the mold. The cure time takes about 4-8 weeks in accordant with different kinds of oil.	Refine fatty acid and made from plant refine oil such as coconut oil, palm oil and castor oil...etc., so it's not easy to cause allergy.
Strength	<ol style="list-style-type: none"> <li>1. Lower price.</li> <li>2. Higher hardness.</li> </ol>	<ol style="list-style-type: none"> <li>1. Higher price.</li> <li>2. Saponify from natural plant refine oil.</li> </ol>	<ol style="list-style-type: none"> <li>1. Multiple color options.</li> <li>2. Highly moisturize of glycerin.</li> <li>3. Natural plants refine oil.</li> <li>4. No cure time.</li> <li>5. Lower affective when add fragrance and extracts.</li> <li>6. Plenty of shape options.</li> </ol>
Processing Time	High mess production effectiveness.	Longer cure period. ( About 45 days)	No cure time, high mess production effectiveness.
Weakness	<ol style="list-style-type: none"> <li>1. Good Cleansing result.</li> <li>2. Worse skin-friendly feeling.</li> </ol>	<ol style="list-style-type: none"> <li>1. It will harm the skin if the saponification of the sodium hydroxide is not enough.</li> <li>2. Unpleasant smell caused by oil oxidation..</li> <li>3. Limited color options.</li> <li>4. It caused volatilization of fragrance because of the long cure period.</li> </ol>	<ol style="list-style-type: none"> <li>1. Higher price than commercially available mechanical soap.</li> <li>2. Softer then mechanical soap and CP soap.</li> </ol>

## 皂類代工/Oem services of soap

依照不同的產品功能、訴求，提供顧客最專業的意見為每個客戶量身訂做產品配方，製作符合客戶的高規格服務。

According to different product functions and requirement, we provide customers the most professional suggestions and customized formulation to meet every customer's need.

## 代工流程/Oem procedure

### 1. 客戶需求 Expectations from customers

與客戶討論需求，皂的香味、顏色、配方、數量。

Discuss the fragrance, color, formulation and order quantity with customers.

### 2. 研發樣品 Sample development

依照客戶討論後需求製作樣品。

Developing samples based on customer's requirement.

### 3. 內部樣品測試 Internal sample testing

### 4. 樣品確認 Sample confirmation

提供樣品給客戶確認。(依客戶回饋意見進行樣品修改)

Provide the samples for customers to confirm.

(Modify the samples in accordant with customer's feed back.)

### 5. 報價/訂單確認 Quotation/ Order confirmation

下訂數量及交期確認

Order quantity and delivery confirmation.

### 6. 製作生產 Manufacturing

### 7. 品管包裝檢驗 Quality control

### 8. 出貨 Delivery

## 型狀類型/Shapes

### A. 基本管模形狀/Basic mold types

The smell, shapes and the washing conditions could be customized or developing samples to touch customers' need.

### 麩胺酸金箔鹽晶皂

- ※60%高濃度胺基酸製成、無石化來源活性劑。
- ※天然來源無皂鹼、能與肌膚到達平衡的弱酸性。
- ※添加稀有晶礦菁粹，全方位啟動原始的美麗能量。
- ※深層清潔同時也給肌膚輕柔的養潤力。
- ※弱酸性，與皮膚表面pH值相近。
- ※形狀、顏色、成分，皆可依客戶需求製作、調配。

### Glutamic Acid Gold Foil Salt Soap

- ※ Made from high purity acid, and the purity is above 60%, without petrochemical active agent added.
- ※ Alkali free and natural sources help our skin could be balanced into acidulous.
- ※ Unique gemstone extracts added, and it's the all-directionally switch on the primitive power of beauty.
- ※ Deep cleansing and offers nutrient tenderly to our skin.
- ※ Acidulous, similar with the pH of our skin.
- ※ All the shape, color, ingredient are adjustable in accordant with customers' need.

### 果凍QQ皂

- ※柔軟有彈性，觸感極佳；洗起來無死角。
- ※膠原親膚性成分，溫和不刺激。
- ※弱酸性，與皮膚表面pH值相近。
- ※嬰兒適用。
- ※無皂鹼。
- ※無添加抑菌劑、無化學成分色料。
- ※形狀、顏色、成分，皆可依客戶需求製作、調配。
- ※禁止食用。

### Jelly QQ Soap

- ※ Soft and elastic, very good touch; no dead ends when washing.
- ※ Collagen skin-friendly ingredients, mild and not irritating.
- ※ Weakly acidic, similar to the pH of the skin surface.
- ※ Baby is applicable.
- ※ No soap base.
- ※ No added bacteriostatic agents, no chemical ingredients.
- ※ Shapes, colors, and ingredients can be produced and blended according to customer needs.
- ※ Not allowed to eat.

### 舒壓芬多精皂

舒壓芬多精皂富含大量由天然椰子油和棕櫚核仁油中精煉出的潔淨分子及蓖麻油等成分，能清潔同時滋潤肌膚，洗後能使全身肌膚清爽舒鬆、水潤明亮。

成分：香精(沉香、柳杉)、甘油。

### 蕉皮素美肌皂

蕉皮素美肌皂富含高量新鮮台灣香蕉精華，且經清洗壓碎後直接加入皂中，不經任何化學處理，讓美肌皂擁有最自然的色澤及甜香。對於肌膚的保濕、提亮及改善問題肌膚皆有顯著效果。

成分：香蕉泥、月桂酸、甘油。

### 活絡薑黃皂

生薑黃或薑黃汁有助於改善皮膚外觀，使皮膚變得更柔軟。由於含有四氫大麻酚，薑黃還是一種強大的抗氧化劑，可以有效抵禦紫外線輻射。

成分：維他命B3、薑精油、迷迭香精油。

### Phytoncide Soothing Soap

Phytoncide soothing soap rich with cleansing molecule that refined from natural coconut oil and palm kernel oil, and castor oil etc...., you could have SPA therapy, soothing experience and skincare efficacy after shower.

Ingredients: Fragrance (Agarwood, Cryptomeria), Glycerin.

### Banana Beauty Soap

Banana Beauty Soap is rich with quintessence of fresh Taiwanese banana, it added into soap after washed and mashed without any chemical treatment, this makes the beauty soap present the most natural and sweet smell. For moisturizing, brightening and solve the skin problem with significant effect.

Ingredients: Banana Puree, Lauric Acid, Glycerin.

### Curcuma Longa Reviving Soap

Curcuma or curcuma juice helps improving the skin appearance, and makes our skin become softer. As a result of there is tetrahydrocannabinol, and also the curcuma is a kind of tough antioxidants, resists the ultraviolet light effectively as well.

Ingredients: Vitamin B3, Ginger Essence, Rosemary Essence.

### 紫草寶貝健康皂

嬰兒肌膚處於最柔嫩並且缺乏防禦力的狀態需要能溫和洗淨並能同時呵護肌膚的植萃皂。  
紫草寶貝健康皂富含pH 5.5的溫和椰子洗淨分子，不含皂鹼，不對肌膚過度去脂。

成分：紫草根精華、乳油木果脂、胡蘿蔔油。

### 熟齡修護舒潤皂

特別為銀髮族設計的高效修護舒潤皂，為容易乾燥、乾癢、脆弱的成熟肌膚提供全面的解決方案。結合四大營養植物油，酪梨、甜杏仁、可可脂及有效增加肌膚柔軟度的巴巴蘇油，集中修護乾敏肌膚的不適現象。

成分：巴巴蘇油、沒藥醇、蜂王乳。

### 摩洛哥咖啡因洗髮皂

專為調理頭皮設計的專業配方。添加摩洛哥堅果油及咖啡因萃取，養護頭皮並強健髮根，有效調理頭皮健康，使髮絲呈現自然光采。

成分：摩洛哥堅果油、小麥胚芽油、生薑萃取液、維他命B5、咖啡因。

### Lithospermum Baby Healthy Soap

The situation of baby skin will need more protection softer treatment while cleansing, as their skin is the softest and lac of defensive.  
Our Lithospermum Baby Heathy Soap is full of pH5.5 coconut ingredient which is moderate, alkali free and won't over-cleaned.

Ingredients: Lithospermum Extraction, Shea Butter, Carrot Oil.

### Mature Skin Repairing and Moisturizing Soap

This efficient skin repairing and moisturizing soap was designed for people aged, and offers their itching, dry and frail skin a wonderful treatment. Included four kinds of nutritious plant refine oil such as: Avocado, Sweet almond, coco fat and Babassu oil which soften our skin effectively, to concentrate on repairing the dry and sensitive skin.

Ingredients: Babassu Oil, Bisabolol, Royal Jelly.

### Morocco Caffeine Hair Soap

Professional formulation for conditioning the scalp. We add Morocco nut oil, extract of caffeine to robust the hair tips and nourish the scalp, and also let your hair shows wonderful appearance.

Ingredients: Morocco Nut Oil, Wheat-Germ Oil, Ginger Extract, Vitamin B5, Caffeine Extract.

### 銀耳燕窩皂

以珍貴的燕窩萃取、銀耳以及蠶絲蛋白，為肌膚帶來極致的保濕養潤。搭配水解卵殼膜，增強修復乾燥肌膚，解決乾粗不適的肌膚問題。

成分：燕窩萃取、銀耳、蠶絲蛋白。

### 青黛淨白皂

青黛、山金車及蛇婆子萃取有效使肌膚白皙細緻、水嫩透亮，並修復肌膚表面。搭配高效潤肌功能的珍貴海茴香萃取，使肌膚由裡到外徹底淨透飽滿。

成分：金山車萃取液、蛇婆子萃取液、青黛粉。

### 黃連牡丹皮抗菌皂

黃連萃取及牡丹皮能有效協同調理肌膚問題。另搭配金縷梅萃取，更能安撫舒緩不安的肌膚，能深層控油、暢通緊緻毛孔，並徹底清除過度分泌的油脂和髒汗。

成分：黃連萃取液、金縷梅、牡丹皮。

### Tremella and Cubilose Soap

Extracts from precious cubilose, tremella and fibroin moisturized your skin extremely, arranged in group with hydrolyzed eggshell membrane to repair the dry skin, and solved the problem of dry and uncomfortable skin.

Ingredients: Cubilose, Tremella, Fibroin.

### Indigo naturalis whitening Soap

Indigo naturalis, an arnica and waltheria indica.extracts effectively make our skin brightening, fair, moisturizing and whitening, and also repair the surface. Arranged in group with the precious extract of crithmum maritimum to make skin totally clean and satiated.

Ingredients: An Arnica Extract, Waltheria Indica Extract, Indigo Naturalis Powder.

### Coptis Chinensis Tree Peony Root Antibacterial Soap

Extracts of coptis chinensis and tree peony root recuperate our skin problem effectively, appease and soothing the uncomfortable skin with additional witch-hazel. For deeply oil control, firming pores, and clean the excessive oil secretion and dirt thoroughgoing.

Ingredients: Coptis Chinensis, Witch-Hazel, Tree Peony Root.

### 蜂蜜蜂巢皂

最天然的美容力量-蜂王乳，富含多種營養素能防止膠原蛋白流失，使肌膚撫平細紋、防止老化。另添加潤澤蜂蜜，更能有效呵護肌膚，使肌膚彈潤緊緻。

成分：蜂蜜、蜂王乳。

### 開運金條皂

討喜金條造型，最佳送禮、自用招財小物，檀香香味典雅濃郁，能有效鎮靜內心、緩解疲勞和壓力清潔並滋潤肌膚，洗澡放鬆的同時讓你擁有充沛的招財能量！

成分：檀香香氛油、雲母粉。

### 超可愛綿羊皂

羊毛脂-使肌膚柔軟細嫩有彈性，並具有卓越的保濕功效，並減少角質層的水份及脂肪散失。

成分：羊毛脂、乳木果油。

### Special Shape Series

#### Honeycomb Soap

Royal jelly – the most natural beauty-power, rich with multiple nutrient and prevent the outflow of collagen, smoothing the wrinkles and retard aging. In the other hand, natural honey added could moisturize and nourish skin, also make it tender, soft and tight.

Ingredients: Honey, Royal Jelly.

#### Fortune Bullion Soap

To most of Chinese, this pleasing bullion shape would be a best gift choice, or we could using it to attractive fortune on our own. With elegant and rich aroma of sandalwood, it calms our mind, release pressure and fatigue while we taking shower, not only clean and soften our skin, but also attractive fortune and full of energy at the same time.

Ingredients: Sandalwood Essence, Mica Powder.

#### Cutie Sheep Nourishing Cream Soap

The extraordinary moisturizing effect of lanolin is being able to make skin tender and elastic, also reduce the outflow of water and fat from the stratum corneum.

Ingredients: Lanolin, Shea Butter.
